Informações

Filtro do Ar

⚙️ Função

O Filtro do Ar protege o motor retendo todas as partículas nocivas que possam afetar seu funcionamento e desgaste prematuro.

⚙️ Desempenho

O motor precisa de ar para a queima perfeita. Porém, o ar possui contaminantes como fuligem, poeira, areias e até partículas de líquidos. Esses contaminantes, que são abrasivos, afetam o funcionamento do motor e o Filtro do Ar garante que apenas ar limpo, e na quantidade ideal, chegue aos sistemas do motor e à câmara de combustão.

✂️ Manutenção

Com o Filtro do Ar funcionando corretamente, além do motor ser poupado, ele impede que partículas de sujeira cheguem à câmara de combustão, mantendo - inclusive - o ar do ambiente interno do automóvel livre da poluição, ou seja, outra boa razão para que este componente esteja sempre em boas condições.

🛢️ Economia de combustível

Fazer a troca do Filtro do Ar quando necessário evita o aquecimento do motor. Se saturado, o Filtro do Ar obstrui a passagem de oxigênio para o motor do veículo, ocasionando a perda de potência do veículo, o consumo exagerado de combustível e o aumento de emissão de gases na atmosfera.

✂️ Troca

Alguns sinais podem indicar a substituição do filtro ou sua limpeza, como fumaça escura saindo do escapamento do veículo e perda de potência ao acelerar. É importante seguir as orientações do Manual do Veículo.

Filtro do Óleo

⚙️ Função

O Filtro do Óleo retém as diversas partículas e impurezas existentes no circuito de lubrificação geradas pelo uso do motor, como oxidantes, partículas de metal, poeira e sujeiras.

⚙️ Desempenho

O Filtro do Óleo ajuda a preservar o motor, mantendo sua potência e rendimento ao mesmo tempo em que mantém a uniformidade de circulação e eficiência do óleo lubrificante.

✂️ Manutenção

Um filtro em perfeitas condições contribui para o fornecimento constante de fluxo de óleo ao sistema de lubrificação do motor. Sem isso, o motor não giraria nem por um segundo sem danificar seus componentes.

🛢️ Economia de combustível

A troca regular do Filtro do Combustível preserva as peças móveis do motor, garantindo proteção contra toda e qualquer impureza que poderá desgastá-lo prematuramente ou até mesmo fundi-lo. Um filtro saturado, ou seja, com uma grande quantidade de impurezas retidas, acaba liberando o fluxo contínuo de óleo sem filtragem para o motor.

✂️ Troca

Recomenda-se a troca do Filtro do Óleo a cada duas trocas de óleo lubrificante do motor, sendo que a primeira troca do filtro deve ocorrer na primeira troca do óleo lubrificante. É importante seguir as orientações do Manual do Veículo.

Filtro do Combustível

⚙️ Função

O Filtro do Combustível retém as impurezas, sujeiras e resquícios de ferrugem que podem ficar acumuladas no tanque do combustível de veículos com motores à gasolina. Muitas dessas impurezas são causadas devido a qualidade duvidosa dos combustíveis.

⚙️ Desempenho

O filtro saturado impede o fluxo normal do combustível no sistema e isso pode ocasionar a queima da bomba e problemas no sistema de injeção eletrônica, fazendo com que o veículo perca potência tanto na marcha lenta, como no arranque do veículo.

✂️ Manutenção

O Filtro do Combustível faz com que essas impurezas não prejudiquem o motor, alimentando o sistema de injeção (ou carburação) com combustível limpo, evitando falhas no funcionamento do veículo.

🛢️ Economia de combustível

O Filtro do Combustível é responsável por reter as impurezas que são mandadas do tanque de combustível para o motor. Se entupido, ele também influencia na mistura de ar e combustível. E tudo que interfere nessa mistura tem ação direta sobre o consumo de combustível.

✂️ Troca

Dificuldade na aceleração ou marcha lenta irregular? Está na hora de trocar o Filtro do Combustível. A maioria das montadoras recomenda a troca do Filtro do Combustível a cada 10 mil km rodados.

A empresa

Nova marca, novas embalagens, novos produtos e apenas o começo de muitas novidades que vem por aí...

Desde 2007 a Filtros Brasil atua de forma visionária no mercado de reposição de peças automotivas. A empresa possui um portfólio completo de filtros de cabine e em 2019 expandiu sua atuação com o lançamento das linhas de Filtros do Ar, Óleo e Combustível, que superou expectativas do aftermarket automotivo e trouxe benefícios para toda rede de distribuição.

Hoje referência e uma das marcas mais conhecidas e consumidas no mercado, a Filtros Brasil acredita que inovar é um fator essencial para o crescimento. A expansão do portfólio de produtos com novas soluções e novos negócios, viabilizou o projeto de re-design da marca que agora está mais moderna, leve e transparente e o desenvolvimento de um novo grupo de embalagens com uma comunicação mais eficiente e QRCode que facilitam a aplicação.

Empresa 100% brasileira

Empresa líder no seu segmento

Maior portfólio de filtros de cabine

Linhas leve, pesada, agrícola e fora de estrada

Novas soluções para o mercado de reposição

Aftermarket Filtros Brasil

Diferenciais para você, distribuidor, sair na frente!

Oportunidades, sempre à frente

O trabalho em equipe, a inovação, o suporte eficaz, com um atendimento inteligente, pode criar mais oportunidades para seu negócio. A assistência comercial, formada por coordenadores especializados e representantes comerciais, disponibiliza um material de apoio para distribuidores e PDV, além de ferramentas online que ampliam a comunicação para mais e melhores vendas.

Qualidade e desempenho comprovados

Há mais de 10 anos certificada na ISO 9001, hoje também adota o sistema de gestão lean manufacturing, o qual garante alinhamento e padronização nos processos, produtos testados em laboratórios internacionais, que resultam, melhores resultados e maior eficiência.

Pós-venda apto

Time técnico altamente especializado e treinado para auxiliar a área comercial e solucionar dúvidas dos clientes. Na Filtros Brasil você tem garantia de adquirir um produto com o melhor custo-benefício do mercado. E mais: a inovação, as pesquisas e a tecnologia não param! Semanalmente o portfólio de produtos é atualizado com novos filtros, de acordo com os lançamentos do mercado, e comunicados são enviados ao distribuidor por e-mail, redes sociais e site.

Novas embalagens

+seguras +explicativas +modernas +informativas

Inovar, facilitar e oferecer o melhor: Embalagens com produtos selados para proteção, melhor engenharia de cubagem, ganhos logísticos e de armazenamento, além de conteúdo de informação do produto visível no estoque.
